Career Objective

To leverage my 5+ years of frontend development experience and transition into a Full Stack Developer role by building scalable, high-performance applications while continuously learning backend technologies.

Technical Skills

Frontend: AngularJS, Angular 11 & 17, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Angular Material, RxJS, NgRx, Chart Js, RESTful API's, Backend for frontend(BFF), Micro-frontend

Backend: Java, Spring Boot, Node.js

Database: MySQL

Tools: Postman, VS Code, Eclipse, Oracle SQL Developer, MySQL Workbench, Figma, Netlify, GitLab CI/CD, Version Control- GIT, SVN, Jira,

Projects & Professional Experience

Sonata Software | Frontend Developer | Apr 2023–Present

Developed responsive, reusable, and modular UI components using Angular 11 & Angular 17 for bank's admin and merchant dashboard revamp project.

Developed authguard for role based access and worked on charts, tables, encrypt/decrypt requests, upload and download functionalities.

Implemented state management using NgRx for efficient application state handling. Used RxJS operators to manage asynchronous data flow and API communication.

Integrated multiple RESTful APIs for policy, claims, and customer management. Developed Reactive Forms with custom validations and dynamic form controls.

Optimized application performance using Lazy Loading, Change Detection optimization, and code splitting.

Worked closely with backend developers to design API contracts and resolve integration issues.

Fixed production issues and implemented enhancements based on client feedback.

Technologies : Angular 11&17, Typescript, JavaScript, HTML5, CSS3, Bootstrap, REST API, Responsive Design, MaterialUI, UI Development, Agile Scrum, JIRA, Github

Tata Consultancy Services | Frontend Developer | May 2021–Apr 2023

Developed functionality rich web application using AngularJS, JavaScript, HTML5, CSS3, and Bootstrap for one of the leading bank's dashboard application.

Implemented dynamic forms, dashboards, and data tables with client-side validation and developed charts to visualize the data.

Implemented secure request encrypt and decrypt for frontend API interactions And developed download and multiple file upload functionalities.

Integrated RESTful APIs and handled asynchronous data loading.

Optimized application performance by minimizing DOM manipulations and improving page rendering.

Worked closely with backend developers to integrate APIs and resolve integration issues.

Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.

Technologies : AngularJS,JavaScript,HTML5,CSS3,Bootstrap,jQuery,REST API,Responsive Design,Cross-browser Compatibility,UI Development,Agile Scrum,JIRA,SVN

Education

B.E. - Velalar College of Engineering and Technology (2017-2021)

CGPA: 7.94
